

DILEEPA ASHEN

SOFTWARE ENGINEER | FULL-STACK DEVELOPER

Kalutara, Sri Lanka | +94 754330940 | dileepaashen81@gmail.com | linkedin.com/in/dileepa-ashen
github.com/DileepaAshen2000 | dileepa ashen - portfolio

PROFESSIONAL PROFILE

Software Engineer and Full-Stack Developer with hands-on experience developing scalable web and mobile applications, backend services, RESTful APIs, databases, and cloud-based solutions. BSc (Hons) in Information Technology graduate from the University of Moratuwa with a GPA of 3.67 (Second Class Upper Division), with practical experience in full-stack development, solution architecture, system integration, and production deployment. Skilled in translating business requirements into practical technical solutions and applying modern software engineering practices throughout the Software Development Life Cycle (SDLC).

EDUCATION

UNIVERSITY OF MORATUWA

2022 - 2026

B.Sc. (Hons) in Information Technology

- Second Class Upper Division | GPA: 3.67 | Dean's List : 3 Semesters - L2S2, L4S1, L4S2

Sri Sumangala College - Panadura

2017 - 2019

G.C.E. Advanced Level (2020)

CORE SKILLS

Frontend & Mobile	: React.js, Next.js, Redux, HTML/CSS, Flutter, Tailwind CSS, Bootstrap, Dart, JavaScript
Backend & APIs	: Node.js, Express.js, REST APIs, Spring Boot, JWT Authentication, Prisma ORM, OCPP
Database & Integration	: SQL (MySQL), MongoDB, Firebase, Stripe, PayHere
Cloud & Deployments	: AWS, Docker, Nginx, Linux/Ubuntu, VPS Deployment (Hostinger), Git, GitHub
Software Engineering	: Agile/Scrum, SDLC, Requirements Analysis, Testing, Debugging, System Integration, Technical Documentation, Production Deployment

PROFESSIONAL EXPERIENCE

APEAKSTRATEGY

Sri Lanka

Software Engineer

Mar 2025 - Present

- Led requirements discovery across 6 client engagements, analyzing business workflows, functional requirements, priorities, and technical constraints to define implementation-ready software solutions.
- Presented proposed workflows, system capabilities, and technical approaches to client stakeholders, helping align business expectations with implementation scope across 8 production projects.
- Prepared solution specifications, feature definitions, architecture flows, implementation scopes, and technical documentation to coordinate development and delivery across web, mobile, backend, database, and cloud components.
- Managed Linux/VPS environments, cloud deployment, and production support while maintaining reliable application delivery.

HASTHIYA COMPANY

Sri Lanka

Associate Software Engineer

Aug 2025 - Feb 2026

- Progressed from Software Engineering Intern to Associate Software Engineer after 6 months, taking increased responsibility for production application development and delivery.
- Delivered functionality across 2 application layers - web, and backend services using React.js, Node.js, Express.js, Firebase, MySQL, and REST APIs across development, integration, testing, debugging, and deployment.

Software Engineering Intern

Feb 2025 - Aug 2025

- Completed 6 months of hands-on software engineering experience, contributing to frontend, backend, database, payment integration, testing, and deployment activities.
- Assisted in developing backend APIs, server-side logic, request handling, database operations, and Stripe integrations.
- Built responsive application features using React.js, JavaScript, HTML, and Tailwind CSS, while supporting debugging, testing, code improvements, and deployment activities.

PROJECTS

LANKA EV PLUS - EV CHARGING & MOBILITY PLATFORM

Oct 2025 - Apr 2026

Flutter / Node.js / REST APIs / MySQL / OCPP / WebSockets / Payhere

- Developed a full-stack EV charging platform comprising 3 main applications: a cross-platform mobile application, a web platform, and an administrative dashboard, with real-time charging station information.
- Integrated OCPP-enabled 60 kW chargers with backend APIs and real-time communication, enabling station discovery, charger availability, charging-session control, payments, and monitoring for 600+ users.
- Responsive web and mobile interfaces and integrated PayHere for secure payment processing.

GREEN-LIGHT SOLAR LANKA – WEB APPLICATION

Jan 2026 - Aug 2026

React / Node.js / REST APIs / MySQL / Firebase / Tailwind CSS / Payhere

- Developed a full-stack web application supporting 4 core business workflows: product management, order processing, payments, and administrative operations.
- RESTful APIs for product, order, and user management using Node.js, with MySQL and Firebase for data management and application services.
- Integrated the PayHere payment gateway for secure online transactions and built a responsive, user-friendly interface using React and Tailwind CSS.

CEYLON LUXURY LIVING – WEB APPLICATION

Sep 2025 - Dec 2025

Next.js / Node.js / Firebase / Tailwind CSS

- Developed a responsive web application for managing and publishing luxury lifestyle and magazine content.
- Implemented dynamic content management, article publishing workflows, backend API integration, and database operations.
- Improved application usability, navigation, responsiveness, and content management workflows.

MENSA – WEB APPLICATION

Mar 2025 - Dec 2025

Next.js / Node.js / Firebase / Tailwind CSS

- Official web application and admin panel with Next.js, implementing content management, user administration, secure authentication, and responsive user interfaces.
- Backend APIs, Firebase database operations, and role-based access control (RBAC) to support dynamic content management, secure user access, and reliable system functionality.

HATE SPEECH DETECTION AND TREND ANALYSIS IN SINHALA LANGUAGE

Final Year Research - 2026

Python / Machine Learning / Deep Learning / Text Embedding / XAI / Google Colab

- Designed, implemented, and evaluated a 3-model hate speech detection architecture using CNN, BiLSTM, and XLM-RoBERTa with multiple model-fusion strategies.
- Implemented SHAP and LIME for Explainable AI (XAI) to interpret model predictions, identify influential features, and support statistical evaluation of model performance and consistency.
