TECHNICAL SKILLS

Programming Languages

- C, Java, Python, JavaScript, TypeScript, Dart

Web Development

- HTML, Tailwind, Bootstrap
- ReactJs, NextJs
- Redux
- Node/ExpressJs, Spring Boot
- Prisma ORM

Database Management Systems

- MySQL, PostgreSQL, MS SQL
- MongoDB, Firebase

Mobile Development

- Flutter

Cloud & DevOps

- AWS
- Hostinger
- Docker
- CI/CD Pipelines

AI & Intelligent Systems

- OpenAI APIs, Prompt Engineering
- Explainable AI (XAI)

Other Tools & Technologies

- Firebase Services
- Stripe Integrations
- Payhere Integrations

ABOUT ME

Software Engineer with industry experience in developing scalable web and mobile applications, SaaS platforms, and modern digital solutions. Passionate about building high-performance applications, solving real-world problems, and continuously improving through modern software engineering practices and innovative technologies.

EXPERIENCE

APEAKSTRATEGY

(2025 Mar - Present)

Co - Founder | Software Engineer

- Co-founded a digital solutions and marketing startup delivering web, mobile, and branding solutions for multiple clients.
- Led solution architecture, DevOps operations, hosting, VPS/server management, and cloud deployment for production systems.
- Manage production deployments, system integrations, and application improvements

HASTHIYA IT

(2025 Feb - 2026 Feb)

Software Engineering Intern

- Developed full-stack web applications using React.js, Node.js, Express.js, Firebase, and MySQL.
- Assisted in developing backend functionalities, including API creation, request handling, and server-side logic.
- Improved responsive UI/UX design and collaborated with Agile/SCRUM teams on multiple production projects.
- Participated in testing, debugging, and deployment processes.

EDUCATION

BSC. (HONS) IN INFORMATION TECHNOLOGY

University Of Moratuwa

(2022-2026)

- Specialized in software engineering, full-stack application development, cloud technologies, and scalable system design with academic and industry exposure to modern software engineering practices.

Final Year Research: Automated Detection and Trend Analysis of Hate Speech in Sinhala Language

SECONDARY EDUCATION

Sri Sumangala Collage, Panadura

(2017 - 2019)

NON- TECHNICAL SKILLS

- Team Work
- Time Management
- Leadership
- Communication Skills
- Problem Solving

UNIVERSITY ACTIVITIES

- Member - Embedded Systems Laboratory, University of Moratuwa
- Department Facilitator - EXMO Exhibition, University of Moratuwa

COURSES & CERTIFICATES

- Code Rush - 10th Place
UoM - INTECS (2023)
- Hack Moral 6.0 - Participant
UoM - INTECS (2024)
- Spring Boot Crash Course
(Linked In Learning)

LANGUAGES

- English (Fluent)
- Sinhala (Native)

PROJECTS

LANKA EV PLUS - EV CHARGING APP (2025 Oct - 2026 April)

Company Project - ApeakStrategy  

Developed a full-stack EV charging system with mobile app, admin panel, and web platform integrating 60kW chargers, real-time availability and API backend.

- Platform operate under OCPP charging network protocol.
- Secure transactions through payhere payment gateway integration.
- Real-time dashboards, analytics, and cross-platform mobile/web applications.

Technologies - Next.js, Flutter, Node.js, MySQL, Firebase, Payhere

CEYLON LUXURY LIVING - WEB APPLICATION (2025)

Company Project - ApeakStrategy 

Developed a premium magazine web application to manage and publish luxury lifestyle content, ensuring responsive design, smooth navigation, and efficient content handling for an enhanced user reading experience.

- Implemented dynamic content management and article publishing workflows.

Technologies - React , Node.js, MySQL, Firebase, Material UI

MENSA WEB APPLICATION (2025)

Contributed to developing the official website and admin panel, implementing content management, user administration, secure authentication, and improving system usability, performance, and overall user experience.

- Integrated backend APIs and database operations to support dynamic content management.
- Implemented secure user authentication and role-based access control mechanisms.

Technologies - Next.js , Node.js, Firebase, Tailwind CSS

GREEN-LIGHT SOLAR LANKA WEB APPLICATION (Ongoing)

Company Project - ApeakStrategy 

Built a web application to manage solar product listings, payments, and administrative operations, improving product visibility, transaction handling, and overall system efficiency through a user-friendly interface.

- Secure transactions through payhere payment gateway integration.
- Designed RESTful APIs for product, order, and user management.

Technologies - React , Node.js, MySQL, Firebase, Tailwind CSS, Payhere

INVENTORY MANAGEMENT SYSTEM 2024

Level 2 Software Project - Rootcode   

Developed core inventory features including stock-in, stock-out, adjustments, and dashboard functionalities, while enhancing system security and usability through implementation of password recovery and efficient data handling processes.

Technologies - React.js, Spring Boot, MySQL, Material UI
